What an amazing series. I was really happy with it and the ending is really nice; sometimes I feel a lack of closure or unhappy with how things with the characters work out in a game like this. Not the case with the ending here. Just go ahead and get the whole set.. This game sucks\u2665\u2665\u2665\u2665\u2665 When I first saw it on youtube, I thought I would love this game. After I bought it, I immediately regretted it. This game sucks complete\u2665\u2665\u2665\u2665 I absolutely hate this game because (1) the control and interface is way too complicated for no reason, (2) controlling your army has never been more irritating, (3) the "campaign" is nothing more than a map of Korea with cards that symbolize your army floating on top of provinces, (4) the units are unresponsive, (5) the multiplayer doesn't even work, (6) it sucks\u2665\u2665\u2665\u2665\u2665 and (7) the units are so standard, they have nothing unique about them. If you are interested in buying this\u2665\u2665\u2665\u2665\u2665game, I'd recommend buying Men of War: Assault Squad instead. In fact, any game is better than this\u2665\u2665\u2665\u2665\u2665game. I don't understand people can like this game. It has so many bugs and glitches that it ruins the gameplay. DON'T BUY. DO NOT BUY THIS GAME.. Caves of Rage. It's not a bad game or anything like that, but... Super Hexagon is quite a better experience than this.. Absolutely recommended!. Less of a metroidvania & more of a platformer. Nub's Adventure, was a pretty fun experience. While it was mostly a laid back, casual platformer, there were a couple moments that were frustratingly challenging.

This is definitely worth a look. \$7.00 might be a bit steep though.

absolutely horrible.. Really like this route, great use of VLP (very low poly) stock to populate the yards. Player locos are very good and a nice detailed manual.. This is definitely an epoch-making VR game, which is the Arizona sunshine of the Three Kingdoms edition.

I like it very much, I hope you do not give up!. this game is bad. nice simulation human :)
