[Word For Mac Autorecover](#)

---

Save your changes TipsIf neither of the above methods worked, search for '\* TMP' with the Search Companion.. I understand that the auto recovery features has been removed from recent update to Word for Mac 2016, in the past when a file was forced to close, the recovered file would open with 'auto recovery file name' and give you the option of which version you want to restore and use, this feature has.. But with Word, not all is lost We're going to show you how to get your work back quickly.
